Subject: Public consultation on draft RSPG report: RSPG22-035 "Mobile Technology Evolution – experiences and strategies".
Date: jeudi 15 décembre 2022 14:04:47

Dear all,

The Swedish industry organisation TechSweden (TechSverige) have reviewed the mentioned report together with all mobile operators. In general we are positive to the report but we have agreed that we would like to update the Swedish information in "Annex I: 2G/3G phase out status".

Country: Sweden

2G Start of phase-out:

2G Finish of phase-out: Shut down announced for end of 2025 by all MNOs. Migration of costumers has started.

3G Start of phase-out: Phasing out has started and it's in progress. MNOs are switching off as soon as possible but at latest 2025.

3G Finish of phase-out: Announced for 2025 by all MNOs.

Best practices: Close cooperation since 2020, including public information meetings about phasing out 2G/3G between all MNOs, industry association TechSverige and government agency PTS.

Best regards

Tommy Ljunggren
