**RE: REPLY TO THE Public Consultation on the Draft RSPG Opinion on ITU-R World Radiocommunication Conference 2023 by the by the Czech Digital Group, a.s. company**

Date: August 12, 2022
Place: Prague, Czech Republic

Czech Digital Group, a.s., company ID 25842609, headquartered at Skokanská 2117/1, Břevnov, 169 00 Praha 6, Czech Republic, registered in the Commercial Register of the Municipal Court of Prague under file no. B 17187 (hereinafter "**CDG**") is one of leading operators of terrestrial networks for television and radio broadcasting in the Czech Republic. CDG owns and operates digital terrestrial television broadcasting multiplexes, which provide nationwide and regional television and radio broadcasting for major commercial providers of television and radio broadcasting.

**At this moment DTT (DVB-T2) is, according to all available studies, the most frequency-efficient and the most energy-efficient way to distribute media content to a large number of households. There is no other more frequency or energy-efficient technology on the market so far. Therefore, in order to maintain the current TV broadcasting coverage, market competitiveness, cybersecurity and maintain the current low carbon footprint, technological neutrality and long-term regulatory predictability, there is a need for NO CHANGE in the frequency band 470-694 MHz and its long-term allocation for DTT in the Europe.**

**By this statement, CDG would like to fully support the comments of the *České Radiokomunikace a.s.* company as well as of the *Broadcast Network Europe* organization to the WRC-23 Agenda Item 1.5 (UHF review) which clearly demonstrate the high importance of the digital terrestrial television platform in Europe which provides a unique public value for European society.**
