Hi,
I understand that the RSPG released the ITU WRC-23 public consultation in June, with a deadline of 12 August.
From my point of view, there is still a shortage of 5.5 GHz or 6 GHz radio frequencies in the future. It is recommended that the U6 GHz spectrum be used to expand radio frequency band resources.

(*) The band might not become widely available in all Member States
(**) Based on RSC #76 mtg. (Oct. '21)
