**Response to the public consultation on
*The Draft RSPG Opinion on Common Policy Objectives for WRC-15***

Telewizja Polska S.A. (TVP) – Polish Public TV Broadcaster – would like to welcome the opportunity to comment on the draft *RSPG Opinion on Common Policy Objectives for WRC-15*.

Among many WRC-15 agenda items there are several ones that are crucial as far as the future of terrestrial broadcasting is concerned. Please find below our view on these WRC-15 agenda items.

Agenda Item 1.1

TVP fully agrees with RSPG's proposal not to support mobile allocation in the band 470-694 MHz at the present stage.

The band remains essential for the delivery of audio-visual services. Therefore any revisions that may affect terrestrial broadcasting in that band shall not be made in the foreseeable future as proposed in RSPG's draft proposal.

Agenda Item 1.2

As a result of recognizing the band 470-694 MHz as crucial for terrestrial broadcasting in the foreseeable future adequate protection measures shall be applied to minimise harmful interference from other services. Therefore protection measures specified GE06 Agreement shall apply.

Also in order to protect terrestrial broadcasting service from interference applicable protection measures shall be applied on mobile service operating in the 700 MHz band by specifying them in an ITU-R Recommendation referenced in a RR footnote or in WRC-15 Resolution.

Recent allocation changes in the UHF band reduced amount of spectrum available for PMSE. Thus there is an urgent need to identify additional spectrum for these purposes. Therefore additional frequency bands should be identified for PMSE use including the duplex gap and the guard band in the 700 MHz band.
